## About Us

Lumia Aligners, a leading dental aligner manufacturer in the GCC, was founded in 2026 by Dr. Boris Simanovsky. With decades of experience in dental innovation, Dr. Simanovsky has also successfully led Alpha Dent Implants, a globally recognized manufacturer of dental implant systems, for over 15 years.

Built on this strong foundation of clinical expertise and advanced manufacturing, Lumia Aligners became part of the Alpha Group, combining precision engineering with modern orthodontic solutions.

Our production facilities and headquarters are based in Pforzheim, Germany, supported by an international network of official representative offices across Germany, France, Italy, Spain, Portugal, Hungary, Ukraine, Bulgaria, the Philippines, the UAE, and Mexico.
